

## **Lewisburg Saddle Old Growth Forest Hike**

The Lewisburg Saddle Trail Area includes the New and Old Growth Trails to the northeast of the parking area, and the Alpha and Ridge Trails to the southwest. The Old Growth and New Growth Trails are a short hike from the trailhead on the 580 Road, and allow visitors to experience and learn about two very different forest types as they traverse through an old growth stand and a younger, more intensively managed stand.

You can also find more information at the following links:

<http://therighttrail.org/trails/old-growth-trail>

Vans will be located outside the Hilton Garden Inn and will depart for the trailhead at 1:00 pm. PNW-SETAC President Jeff Wirtz will lead the tour, however participants will have plenty of time to walk at their own pace, read the educational placards located along the trails, and enjoy the ambiance that only an old growth forest (and its denizens) can provide!
